

The MDPCP at CCI

CCI Health Services participates in the Maryland Primary Care Program (MDPCP). The MDPCP supports CCI's care team to help us better manage and coordinate your care at no extra cost to you.

Our participation in MDPCP directly benefits you by:

- Reducing the cost of your medical care
- Improving your health and wellness, and
- Ensuring you can make CCI your medical home where you can access all of the medical services you may need in one place.

Services like medical care, behavioral health care, medication management, referral management, social needs support, and ER follow-up all come at no additional cost.

All MDPCP participants identified through the State of Maryland and assigned to CCI are automatically part of this program. As part of this program, Medicare shares some of your health information with CCI and State Designated Health Information Exchange (CRISP) to better coordinate your care. This data is safeguarded according to federal and state law. To opt-out of sharing your personal health information with your practice, you may call 1-800-MEDICARE. If you want to opt-out of data sharing between your care providers through CRISP, please visit <https://crisphealth.org/for-patients-your-rights/>.

To learn more about MDPCP, ask your CCI care team.
